When I am on the road in my big truck and there are adverse weatherand/or traffic conditions in and around St Louis, I want to hear what is going on, on my XMRADIO. XMRADIO displays current NOAA weather alerts. Reporters inform me of current weather and traffic conditions. I worry about my family during severe storms. I want XMRADIO available always so I can see and hear what's going on at home when I am 285 miles away. To all concerned, I say, keep XMRADIO local weather/traffic stations on-the-air. This is a valuable tool for us all. This is the only way I can find out what's going on at home during bad weather when I'm away. KEEP XMRADIO LOCAL WEATHER AND TRAFFIC CHANNELS ON-THE-AIR. Also, they provide great tips on how to keep your car in good running condition. Real handy/useful info.
